Eduardo Solorio Rebollo

TECHNICAL MARKETER & GROWTH ENGINEER

León, Guanajuato, Mexico (CST / UTC-6) | +52 477 558 8302 | edusolorior7@gmail.com | linkedin.com/in/eduardo-solorio-92b6ba333 | github.com/Edubikes

PROFESSIONAL SUMMARY

Bilingual (English/Spanish) Technical Marketer and Growth Engineer with a degree in Marketing and Advertising and a strong technical background in software development and Artificial Intelligence integration. Fast learner with high resilience: promoted from operational roles to general manager of a branch in New Zealand in under 2 years. Experienced in automating traditional workflows with AI-assisted software solutions, optimizing e-commerce channels (Amazon, Mercado Libre), managing paid media campaigns (Google Ads, Meta Ads) and analyzing data (Power BI, ERP systems), working autonomously with asynchronous communication.

PROFESSIONAL EXPERIENCE

Technical Marketer & Web Designer | *Chololoy (Freelance Project)* **2026 – Present**

- Led the production and editing of culinary video-marketing content optimized for social media, driving the brand's distribution strategy in the United States with highly persuasive multimedia content.
- Redesigned and optimized the website using HTML, CSS, JavaScript and Vercel, delivering high-conversion interfaces and fast web performance to capture leads asynchronously.

Software Developer & Operations Automator (AI-Assisted) | *SICESA (Construction Company)* **2025 – 2026**

- Conceived and built, with advanced AI assistance, an interactive web application (sicesa-app.vercel.app) that lets site engineers upload on-site photos and instantly generate automated executive reports, eliminating hours of manual documentation.
- Established a centralized digital tracking channel that improved transparency for active clients, reducing status-inquiry phone calls and streamlining operations by 30%.
- Designed an AI-agent invoicing workflow for petty cash: staff just send a receipt photo to a WhatsApp group, and the agent issues the tax invoice (CFDI) on each merchant's portal, posts the PDF and builds the weekly Excel report. Saves 2+ hours a week and eliminates lost invoices.

E-commerce & Marketplace Coordinator | *Distribuidora de León (Professional Internship)* **2025 (6 months)**

- Managed and optimized the official Amazon and Mercado Libre stores during the internship, applying advanced product-listing SEO and digital inventory control to keep operations agile.
- Handled customer service and dispute resolution 100% online, maintaining gold/green reputation ratings on both platforms and boosting organic ranking.

Branch Manager (promoted from Kitchen Porter) | *La Mexicana NZ (New Zealand)* **2023 – 2025**

- Demonstrated an outstanding work ethic and cross-cultural adaptability, rising from kitchen porter to general manager of the branch within 2 years abroad.
- Oversaw operations with full autonomy, including staff rosters, inventory control and relationships with local customers, 100% in English, ensuring excellent service and commercial profitability without direct supervision.

SELECTED PROJECTS (AI-ASSISTED DEVELOPMENT)

SICESA App | *sicesa-app.vercel.app* **2025 – 2026**

- Built with AI coding tools (Antigravity IDE, Claude Code, Gemini) on Next.js 14, React, TypeScript, Tailwind CSS/shadcn/ui and Firebase (Auth, Firestore, Storage); installable PWA deployed on Vercel.
- Features: one-click PDF photo reports with in-browser image compression, daily site log and incident reporting, Excel-style budgets with copy-paste import and automatic VAT/totals, a materials request-approval flow and role-based access control.

Tampico Terrenos | *Real-estate investment catalog* **2026**

- Interactive land catalog and 3D map (React + Vite, MapLibre GL) that shows each property's market study (cost, sales, profit, ROI) and highlights the highest-ROI listings.
- Python scripts extract the financial figures from PDF studies, and Playwright automates collecting listing photos, removing manual data entry.

Valuador: Methodological Authenticity Index | *github.com/Edubikes/Valuador* **2025**

- Python/Streamlit/pandas tool that scores market-research surveys for cognitive biases (social desirability, post-decision rationalization); used in my university research paper to audit the "New Coke" case.

Marketing Analytics Dashboard | *Universidad Iberoamericana León* **2026**

- Planned and built a marketing and advertising dashboard in Power BI using DAX measures.

TECHNICAL SKILLS & ECOSYSTEMS

Strategy & Growth: Growth Marketing, Google Ads, Meta Ads, E-commerce SEO, E-commerce Management (Amazon, Mercado Libre), Video Creation & Editing (Premiere, CapCut), Campaign Planning

Technology, AI & Data: AI-Assisted Development (Antigravity IDE, Claude Code, Gemini), Frontend (HTML, CSS, JavaScript, React, Next.js, TypeScript, Tailwind CSS), Firebase, Python scripting (Streamlit, pandas, Playwright), Git/GitHub, Vercel, AI Integration & Prompt Engineering, Power BI (DAX), ERP Systems, Data Analysis

Self-Management: Autonomous Leadership, Resilience & Cross-Cultural Adaptation, Efficient Asynchronous Communication, Proactive Problem Solving, Fast Software Learning

EDUCATION

Bachelor's Degree in Marketing and Advertising | Universidad Iberoamericana León **2020 – 2026**

LANGUAGES

Spanish: Native
English: Bilingual / Fluent (2 years living, leading teams and operating in New Zealand)
